luxury trailer house

Luxury Trailer House A Mobile Private Space

The luxury trailer house MOSS is your personal space—designed to go wherever you do.

Just as a cruiser symbolizes luxury and freedom on the sea,

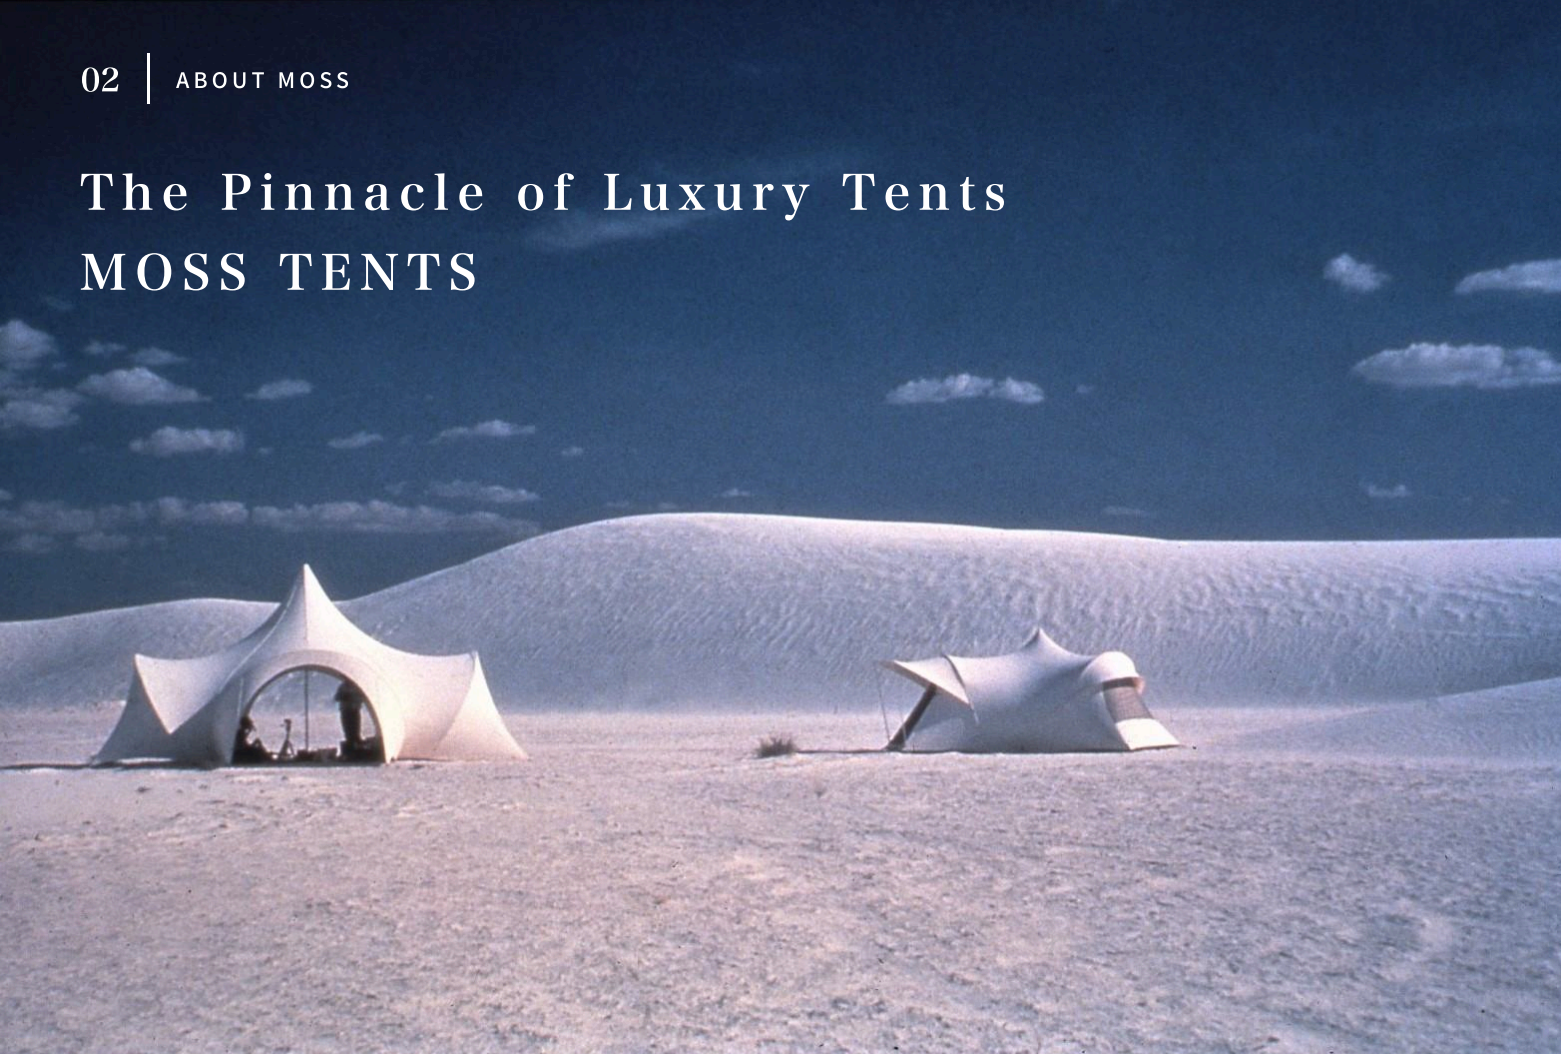

MOSS offers a sense of limitless freedom and a private retreat on land.

Sales price **29.5~** million (JPY)

(Tax included/body only)

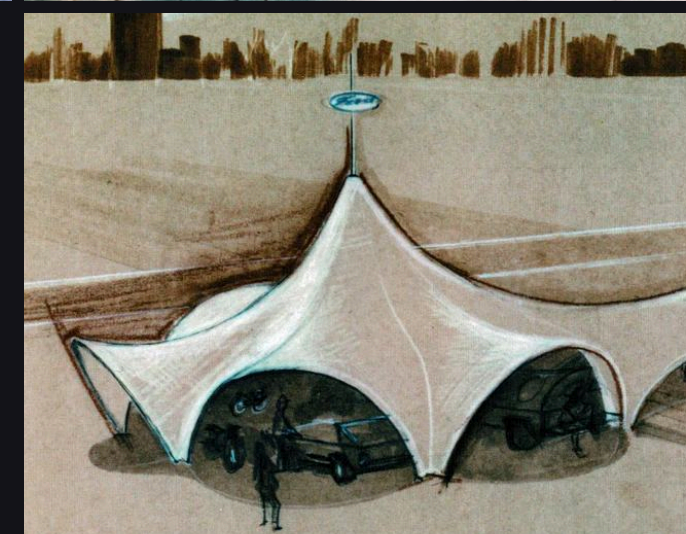

The Pinnacle of Luxury Tents

MOSS TENTS

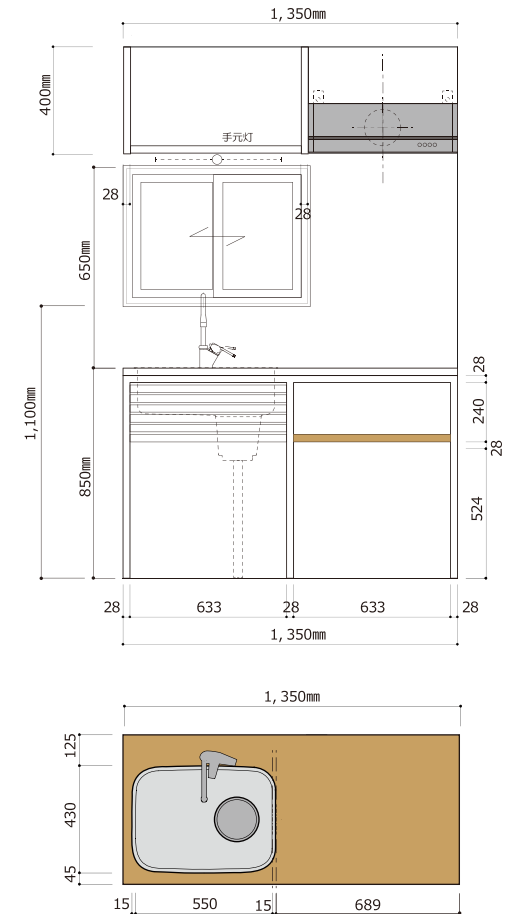

MOSS TENTS is a premier luxury tent brand originating in the United States. The brand's legacy began in 1954, when painter and sculptor Bill Moss invented the world's first dome tent, the iconic "POP-TENT."

Renowned for their pursuit of functional beauty and harmony with nature, MOSS designs have often been described as "livable works of art." These visionary creations have captivated outdoor enthusiasts and adventurers alike. Their artistic significance is so profound that MOSS tents are the only camping equipment to be permanently housed in the Museum of Modern Art (MoMA) in New York.

A Trailer House With a Sophisticated Design and Lasting Comfort

A Custom-Designed Kitchen With Beautiful Wood Grain

The stylish kitchen, featuring a black iron frame paired with wood, was custom-designed for the luxury trailer house MOSS.

Fully equipped with all essential functions, it seamlessly blends into an interior that emphasizes harmony with nature.

Cheek 【Floor heating compatible】 Flooring
PHFL1294 : UV oil painting (Clear)

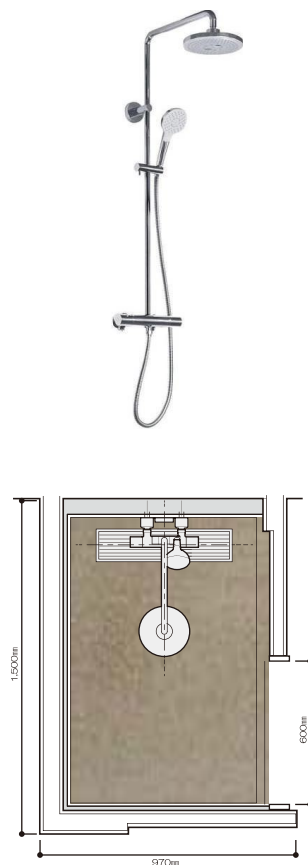

The natural solid wood ceiling and floor create a beautifully unified space.

Its rich textures extend above and beneath your feet, enveloping the room in warmth and character. The wood adds depth and shade to the interior, with a beauty that gracefully evolves over time. Compatible with floor heating, it ensures comfort even in winter. This luxurious design seamlessly blends sophistication with everyday practicality.

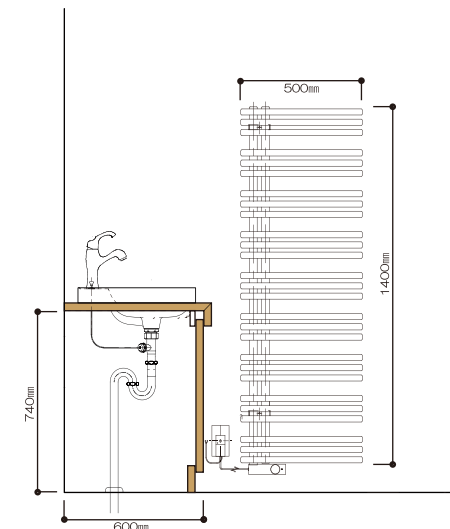

A Wall Lamp With a Tent Design

The sconces (wall lights) featured throughout the room are original MOSS creations, available exclusively in the luxury trailer house MOSS. Their design—crafted by combining CAD drawings of MOSS tents—embodies both artistry and playful spirit.

A blissful shower experience that combines luxurious spaciousness with delicate precision.

This high-performance system features both an overhead and a hand shower. Its finely tuned water flow gently envelops your body, delivering the ultimate in comfort—reminiscent of a luxury spa.

Single-Lever Mixing Fixture

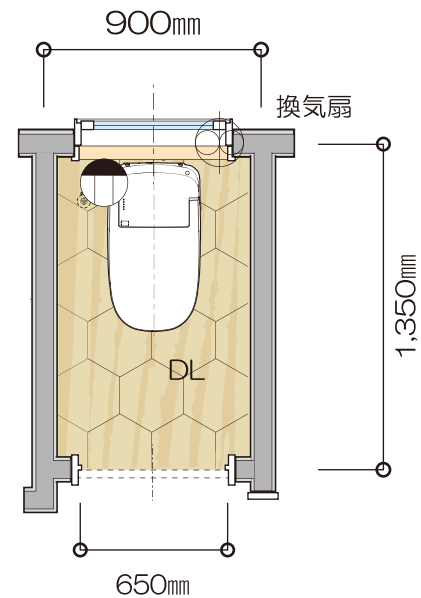

Square Washbasin

A separate sink that blends wall heating with the warmth of natural wood.

The combination of wood accents and integrated wall heating transforms everyday routines into a luxurious experience.

The heating system also functions as a towel warmer, creating a space that is both practical and beautifully designed.

Toilet :
Panasonic "Arauno"

Wallpaper : Lilycara
LWT-4593
will(2022-2023)

Accent walls evoke a sense of refined distinction.

This room features a flush toilet with a heated seat, complemented by botanical wallpaper from William Morris.

The elegant floral motifs bring color and character to the space, creating an atmosphere that feels both luxurious and extraordinary.

High Quality and Design Passed Down From Tents to Trailer Homes

Luxury trailer house MOSS is the only trailer home that carries the DNA of MOSS TENTS—the pinnacle of luxury tent design.

Drawing on decades of expertise in the outdoor industry, we craft high-quality trailer homes with meticulous attention to detail.

Built for durability and comfort, these homes are designed to be cherished for years, becoming the backdrop for lasting memories.

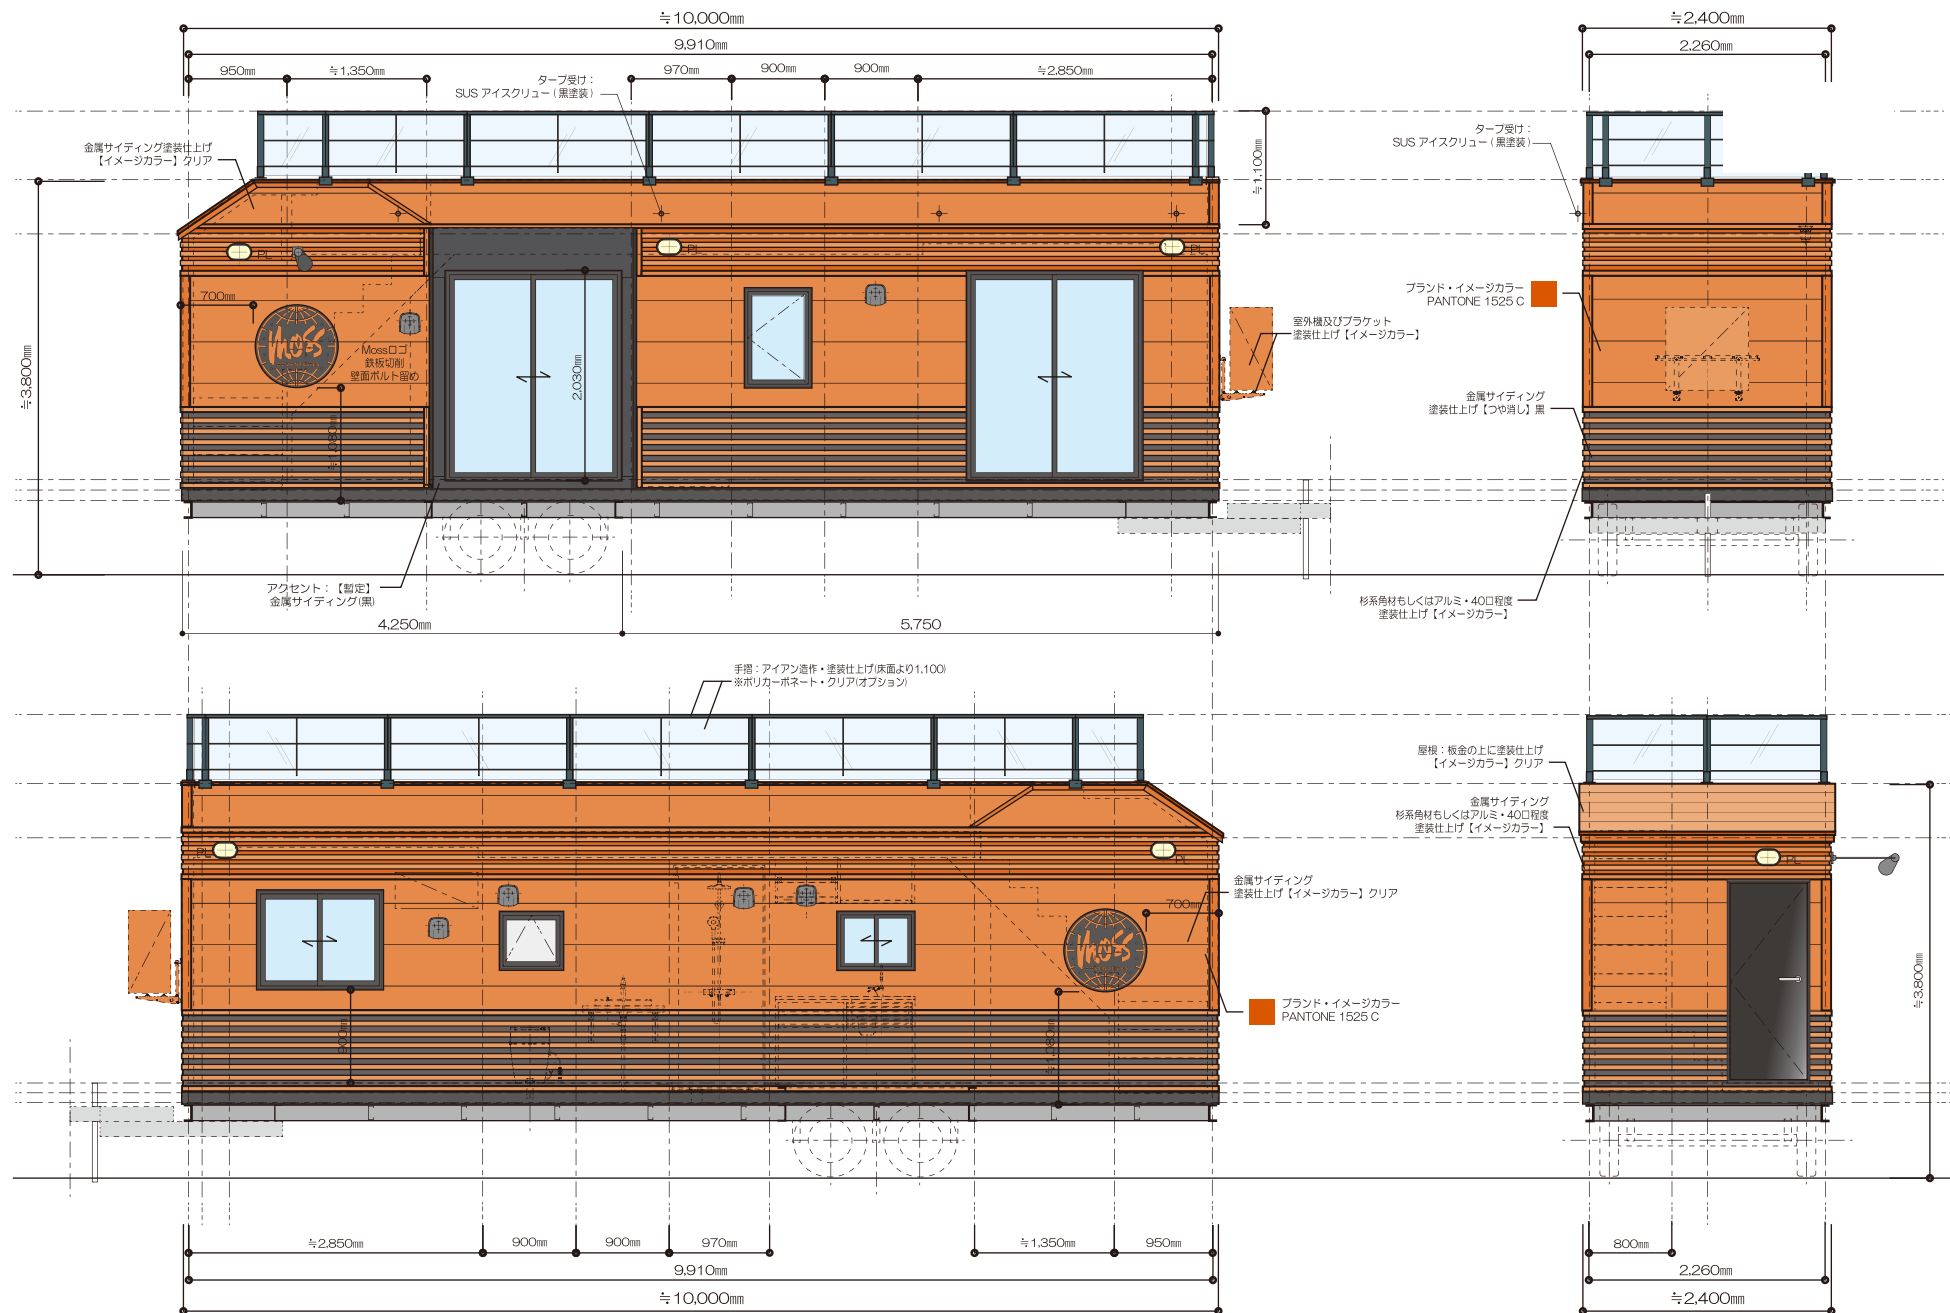

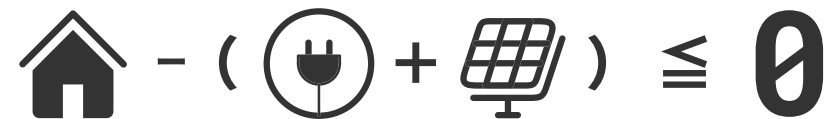

The brand color orange is complemented by the warmth of wood.

The orange hue of MOSS TENTS is inspired by the mystical glow of light filtering through a lantern at night. The luxury trailer house MOSS incorporates wood into its orange-toned exterior, creating a striking and distinctive look that reflects the brand's core theme of coexistence and harmony with nature.

Energy Consumption — (Energy Saving + Energy Generation) $\leq$ Zero

What Is ZEH—A Home That's Kind to the Earth and to Us?

ZEH (Zero Energy House) stands for Net Zero Energy House. It refers to a home that achieves an annual energy balance of approximately zero or less by improving insulation and energy-saving features, and by incorporating energy generation methods such as solar power. Its high-insulation, energy-efficient design ensures year-round comfort and environmental friendliness.

Facilitys	Various equipment	Details
